

PROFILE

My name is Yentl Hendrickx and I'm currently enrolled in the Bachelor of Application Development at Thomas More Geel. I'm a programming enthusiast who loves to dive headfirst into diverse projects and relish the challenge they present. But it's not all about software for me, I'm equally fascinated by hardware and the amazing things that can happen when the two interact.

When I peel myself away from my tech projects, you'll find me hanging out with friends, working out at the gym, or, yes - back at the computer for some gaming.
